

Infrastructure Improvement Projects

In the past two years, the Library completed the remodel of our restrooms, updated our outdoor signage, and completed a planning and design process that developed a phased approach to update the entire building.

This spring and summer we will begin outdoor infrastructure projects to replace our aging roof and parking lot. This coming winter we will begin planning for extensive interior projects. We were able to set aside funds to accomplish these renovations, which will ensure the vitality of our building for years to come.

Cindy Mack, Library Director

Summer 2018 Projects:

Landscaping

- Remove overgrown shrubs and re-seed area with grass
- Add small scale shrubs and/or landscaping at Library Entrance

Parking Lot Repaving

- 2 phase-approach
 - Staff/delivery parking lot late spring.
 - Public (opposite side) late summer, after completion of roof project.

Roof Replacement

- Mid-summer
 - The plan is to limit impact on Millie's Garden and parking lots.
